

# Quality Water for quality life

*Make your own Mineral/purified water at home*

## Aqua-RO (Reverse Osmosis System)

*Reverse Osmosis provides unlimited and purified flow of fresh water!!*

### Standard Features:

- TFC reverse osmosis membrane with up to 99% salt rejection
- Aqua RO systems are available in 5,6 stages with all possible pre/post treatment options
- Automatic feed water shut-off valve
- 5 microns sediment pre filter
- Pre/Post carbon polisher cartridges
- Mineral balancing system (Optional)
- Online TDS monitoring (Optional)
- Storage tank –8 liters (other sizes on demand)
- 220 VAC, Single-phase
- Powder coated frame
- Made in USA

Reverse Osmosis (RO) is the most convenient and economical method of reducing unwanted contaminants in your drinking water. It is the process by which water molecules are forced by the water pressure to pass through semipermeable membrane.

RO membrane only allows water molecules to pass through whereby almost 99% of the impurities coming with the feed water are retained and wasted to drain.

Domestic Reverse Osmosis systems are especially suitable for brackish/sea water having high levels of total dissolved solids (TDS), and removal of bacteria/viruses, toxic metals (arsenic, fluoride, chromium, nitrates, lead). This technology is being used as an integral process by major bottled water manufacturers all over the world including Pakistan.

### Reverse Osmosis Benefits:

- Provides safe and healthy water at an affordable price at your home.
- Just one time installation and get healthy drinking water forever.
- Protect your family against all diseases like typhoid, cholera, diarrhea etc.
- Convenience in your hands

### Aqua –RO Series Domestic RO system:

Model	Aqua-RO-50	Aqua RO-75	Aqua RO-100	Aqua RO-200	Aqua RO-400
Capacity	50GPD	75GPD	100GPD	200GPD	400GPD

*Ro is a true alternative for expensive bottled water!!*

### Switch to RO system now and avoid

- 1) Lifting and handling heavy water bottles
- 2) Wasting time to buy bottles
- 3) Waiting for water delivery trucks
- 4) Making deposits for bottles
- 5) Problems with demand surges (especially with guests)
